

# New Information on How Deaf Children Learn!

Free Workshop For Everyone!

## The Deaf Child's Brain Dr. Gloria Nathanson

### Texas School for the Deaf

1102 S. Congress Ave, Austin, TX 78704

**Saturday, January 31, 2015**  
**9am - 1 PM**

With the rise of neuroscience, there is an increase in research that tries to understand the impact hearing loss has on brain development. With years of studies on deaf children's learning, what has been found or what still remains a mystery will be examined. This workshop provides a summary and review on more recent findings. Interactive discussion to follow on how we teach our Deaf and Hard of Hearing children.

RSVP [ONLINE](#) BY JANUARY 10, 2015
